

Theophanes Raptis

Curriculum Vitae

PERSONAL DETAILS

Birth Date : April 3rd, 1965
Marital Status : Single
Residency : Lefkosias 23 Str., 112 53, Athens, Greece
Tel. : +30 21 08 67 75 09
Mob : +30 69 79 78 03 81
e-mail : rtheo@dat.demokritos.gr
github: <https://github.com/rtheo>
raptis.theophanes@gmail.com

OCCUPATION

Mr Theophanes Raptis is currently a research associate in EU research projects at the R&D Unit of the Division of Applied Technologies, in the NCSR “Demokritos” institute. He is also collaborating with the Physical Chemistry laboratory, Dept. of Chemistry in the University of Athens as well as the El.-Eng. Dept. of the Technical Education Institute of Piraeus.

He holds a BSc in Physics from the University of Crete (1995) and he has followed a post graduate training in theoretical physics from the physics sector of the National Technical University of Athens under a PhD scholarship from the Material Science Institute, NCSR Demokritos (1997-1999).

He worked as a research assistant in Protein Folding and Molecular Dynamics problems at the Queen Mary University of London (2000-2001). He is also a collaborator in research projects at From 2015 he has resumed PhD candidacy at the Telecommunications and Informatics Dept., University of Peloponnese on the subject of “*Optimizing Photonic Crystal Fibers for Tabletop Wakefield Plasma Accelerators*” under supervision of prof. Anthony Boucouvalas of the Communication Networks and Applications Laboratory.

His research interests include computational physics applications, computational modeling and simulation of physical and abstract dynamical systems, cellular automata and complex systems. He is experienced in using FORTRAN, C, MATLAB in the context of such applications and he also has basic knowledge of MAPLE, REDUCE, Maxima programming environments.

Among others, he has developed programs for a special suite of Molecular Mechanics, Monte-Carlo Optimization of polymeric structures and post-processing of Molecular Dynamics trajectories. The suite is constantly under development in cooperation with Dr Vasilios Raptis, currently in FORTH, Heraklion, Crete.

He has a number of publications including articles in peer reviewed journals and ArXiv preprints as well as an essay, titled *Techno-Feudalism*, discussing some far reaching social consequences of massive introduction of advanced technologies.

He has been awarded a patent from the Greek Industrial Property Organisation (OBI) for an Artificial Volition Method in Autonomous Robotics.

PUBLICATIONS

Books

Theophanes Raptis: Τεχνοφεουδαρχία (*Techno-feudalism*) [in Greek], Esoptron eds., Athens, 2007.

A short essay on the consequences of massive introduction of advanced technology into the masses in the era of neo-liberalism and a critique of the ideology of Trans-Humanism from the point of view of the betrayed Enlightenment ideals.

Peer reviewed articles
